

Emergency & Departmental Directory Spring 2011

This information will be updated each semester. If your department has a correction for next semester's update, e-mail them to: robin.pepin@umit.maine.edu

Emergency Directory

Spring 2011

Emergency Numbers

Orono Campus Phones (581 prefix) - Fire, Police, Ambulance 911

Cell Phone and Pay Phones on campus 581-4040

University Park:

From 581 phones -- Police, Ambulance & Fire.....911

From 866 phones -- Police, Ambulance and Fire.....581-4040 or 911

Call boxes that connect you directly with the UMaine Police are located throughout the campus. The call boxes are identified by a blue Emergency light and sign at outdoor locations and by a red 911 phone sign indoors. There are campus phones near the Maine Card readers at all residence halls.

NOTE: For those using VoIP (Voice over Internet Protocol) telephone service, dial 581-4040 for emergencies on campus. When off-campus, check with your local emergency service providers (as 911 will not work on VoIP telephones).

This Directory should be reviewed by all employees at the start of each school year, and by supervisors with all new employees.

EMERGENCY DIRECTORY

EMERGENCY ACTION PLAN

This is the basic employee response plan for emergencies on campus. Each department has an area-specific plan detailing alarm systems, major hazards, exit routes, rally points and specific responsibilities. Contact your supervisor for a copy of your plan.

Evacuate

Upon the sounding of the alarm or detection of an emergency that requires evacuation.

Alert Others:

If you are the person that detects the emergency you should verbally warn others in the area, activate the evacuation alarm system, and call the Police Department from a safe place. (911 from a campus phone or 581-4040 from your cell phone.)

Rally Point

Evacuate to your department designated Rally Point and stay there until released by your supervisor.

Use of Emergency Equipment

It is policy to evacuate the building immediately in case of a fire or other emergency. Only those people who are specifically trained may use emergency equipment.

For Further Information

Contact your supervisor or call Safety and Environmental Management 1-4055 and on the web at <http://www2.umaine.edu/SEM/>

INFORMATION DURING AN EMERGENCY

UMaine students and employees should register with umaine.txt (umaine.edu/umainetxt), a Web-based messaging service that provides timely and accurate information in the event of a campus-wide emergency. The system allows for text message delivery to cell phones, email messages and other forms of electronic communications.

If the campus-wide alarm siren sounds, remain calm and seek information by checking for a umaine.txt message delivered to your cell phone, other hand-held device and/or computer. If those options are not available, a recorded message at 581-INFO (4636) will provide the pertinent information.

MEDICAL EMERGENCY

If you require an ambulance call.....911

Give the dispatcher the following information:

- Nature of injury.
- Location of injured person.
- Special hazards in the area.
- Name of the injured party if available.
- Your name and phone number.
- Do not hang up until the dispatcher releases you.

Render assistance to others, only if you can do so safely, have been trained in first aid, and can utilize the proper personal protective equipment. Do not move an injured person unless they are in immediate danger. If possible meet the ambulance or have someone meet the ambulance and guide the responders to the injured person.

There are public Automatic Emergency Defibrillators (AED) located in the Maine Center for the Arts near the ticket office, at Fogler Library next to the information booth, in the Memorial Union near the information booth and in the hallway between the Field House and the Pit in the Memorial Gymnasium. The AED is identified by and contained in a white box with a blue label.

FIRE

In the event of a fire emergency follow your area-specific emergency action plan. Activate the alarm system and call 911 from a safe place. Also see **Action Plan** on page two. Fires can be prevented by following proper procedures including: proper storage and use of flammable chemicals, and good housekeeping. Hands-on fire extinguisher training is available from Facilities Management, call 1-3049 for further information. For more information about fire prevention and plans call Safety and Environmental Management at 1-4055 and on the web at <http://www2.umaine.edu/SEM/>

CRIMINAL & SUSPICIOUS ACTS

To report a crime in progress such as a fight, a theft, or suspicious activity, call 911. Tell the dispatcher:

- Nature of the emergency.
- Whether or not the incident is still occurring.
- Location of incident.
- Who you are and how you can be reached.

Non-Emergency

To report a crime that has already occurred, please call the Police Department dispatcher at 1-4040. If you want information on Crime Prevention or registration of valuable property, please call the crime prevention

officer at 1-4036. Also available on the web at:
<http://www.umaine.edu/police>

The Security in an Academic Environment Policy available at the Safety and Environmental Management web site at: <http://www2.umaine.edu/SEM/>, addresses security for the University of Maine.

CHEMICAL SPILL EMERGENCIES

Follow your area-specific emergency action plan. Most spills can be prevented by proper transport, storage, and use of chemicals. Do not clean up a chemical spill unless you have received specific **chemical spill clean-up training** and can perform the clean-up safely. For further information see your supervisor or call Safety and Environmental Management at 1-4055 and on the web at <http://www2.umaine.edu/SEM/>

OIL/FUEL SPILLS AND GAS LEAKS

All known or suspected petroleum products spills (to include gasoline, heating oil, diesel fuel, etc.) and gas leaks (to include LP, Chlorine, etc.) are to be promptly reported to the Police Department by calling 911 from a safe place. When calling, be specific as to the building and location of the spill or leak. Precautions should be taken to prevent and contain leaks and spills.

BOMB THREAT

What to do in the event of a bomb threat:

1. If you receive information about a bomb in a University building,
 - Notify the Police – 911.
 - DO NOT pull the fire alarm.
 - Take notes if possible; attempt to obtain a time and any other pertinent information from the source of information.
2. Appropriate units will be dispatched to the threatened building to conduct a quiet search or to evacuate the building, as the University Police Department deems necessary.

EVACUATION INSTRUCTIONS

Should it become necessary to evacuate the campus, you will be alerted to go to the following sites for detailed information: the UMaine website's home page, first class folders, or call 581-info (581-4636). Please remain calm and follow the posted instructions. **Please DO NOT call 911 or 581-4040 for information. This line must remain open for the reporting of immediate emergencies.**

EXPLOSION EMERGENCY

Follow your area-specific emergency action plan. If an explosion occurs in your building, **Evacuate Immediately**. Do not re-enter the building until it is declared safe by the authorities.

RADIATION EMERGENCIES

Employees working in areas where radioactive materials are used must receive appropriate instructions for handling emergencies.

In the event of an incident involving ionizing radiation or radioactive materials:

- Evacuate the area and immediately notify the Policy, call 911.
- When telephoning for emergency service, tell the dispatcher that radioactive materials are present.
- After notification, take every precaution to prevent further release, spread, or needless tracking of radioactive materials.

For further information consult The Radiation Safety Program at <http://www2.umaine.edu/SEM/> or call Safety and Environmental Management at 1-4055.

HANDICAPPED, EMERGENCY PROCEDURES FOR

What to do in the event of a fire, explosion, or chemical release emergency:

Follow your area-specific emergency action plan.

If you are unable to evacuate the building:

- Evacuate to the designated area of refuge. (Typically in or near stairwell).
- If an area of refuge is not available go to a safe area and call 911.

If you need an accommodation to carry out your area-specific emergency action plan, please identify that need to your supervisor so that arrangements can be made. Further assistance can be obtained from Safety and Environmental Management at 1-4055.

WORKPLACE INJURIES & ILLNESSES

All workplace injuries/illnesses must be promptly reported to SEM.

Emergency Medical Attention: Call 911 for ambulance to transport employee to St. Joseph Hospital or EMMC for medical treatment. St. Joseph Hospital is our preferred emergency healthcare provider for the Orono/Bangor area.

Non-Emergency Medical Attention: Cutler Health Center can be called at 581-4000 to set up a medical appointment. Generally your supervisor should make this call.

An immediate appointment will generally be made available for those injuries requiring immediate medical attention. When Cutler Health Center is not open and you have a workplace injury/illness requiring immediate attention such as a cut finger requiring stitches, you

should go to the Emergency Department at Eastern Maine Medical Center.

For a minor injury that does not need immediate attention, please call Cutler Health Center at 581-4000 to get an appointment at an appropriate time.

Overnight admission to a Hospital or Fatality:
Immediately contact University of Maine Police at 581-4040 to initiate further response.

Reporting Work Related Accidents or Illnesses:

All work related injuries/illnesses (whether they result in medical attention or not) are reported to Cannon Cochran Management Services, Inc. (CCMSI), the administrator of the UMaine's workers' compensation /employee injuries and illnesses claims.

Supervisors with a CCMSI login/id and password:

- Report workplace injuries/illnesses using the [CCMSI on-line injury/illness reporting system](#). For information regarding the CCMSI on-line injury/illness reporting system, or to receive training and login-ID, please contact UMaine Human Resources (Employee Health and Benefits Office) at 581-2360.

Supervisors that **do not** have a CCMSI login/ID and password:

- Report the injury/illness by filling out the [Workers' Compensation Employee Injury/Illness on-line Incident Report form](#).

Students Routine Medical Aid:

Report to Cutler Health Center (west side of building toward Bennett Hall). Please refer to our website: www.emmc.org/cutler.aspx?id=40134 for hours of operation.

After Hours and Weekend Care:

Clinicians are also available afterhours and on weekends. These services may be provided at [EMMC Orono Family Medicine](#), located on Kelly Road in Orono, or at [Walk-In Care](#), located on Union Street in Bangor. Please call 207-581-4000, to get in touch with our after hour on-call service.

Student Emergency Room Service:

Eastern Maine Medical Center.....973-8000
489 State St., Bangor

St. Joseph Hospital.....262-5000
297 Center St., Bangor

DISEASE/ILLNESS

Flu

Good health habits are an important way to help prevent the flu:

- Clean your hands often.
- Cover your mouth and nose when coughing or sneezing.
- Avoid close contact. When you are sick, stay home if possible, keep your distance from others.

For more information check on the CDC website:

<http://www.maine.gov/dhhs/health.shtml>

Lyme Disease

Lyme Disease is found in many areas of New England and has now spread to Maine. This is a potentially debilitating disease spread by deer ticks. More information on this disease can be obtained from the Maine Center for Disease Control and Prevention website: <http://www.maine.gov/ddhs/health.shtml>

West Nile Virus (WNV)

WNV is a disease that can lead to an infection called encephalitis (swelling of the brain). WNV is spread by the bite of an infected mosquito. Most mosquito bites do not lead to WNV because very few mosquitoes are infected. However, people over 50 and those with weakened immune systems are at higher risk for serious illness from WNV infection. More information can be obtained from the Maine Center for Disease Control and Prevention website:

<http://www.maine.gov/ddhs/health.shtml>

Rabies/Animal Bites

If you or someone else has been bitten by a wild or domestic animal, report the incident to UMaine Police at 911 immediately. Identify the animal by kind, size, color and place the animal was last seen. Medical attention needs to be obtained immediately and follow ups must be conducted to ensure the safety of UMaine faculty, staff and students.

Suspicious Animal Behavior: Animals exhibiting aggressive behavior or if you suspect an animal has rabies. Symptoms of rabies may include: an animal that is obviously sick; is exhibiting unusual behavior; or has died under mysterious circumstances. Do not move or otherwise touch the animal. Notify the UMaine Police at 911.

Human Bodily Fluids

If you discover what you suspect is blood or other bodily fluids:

- Don't touch it.
- Keep others away.
- Call 911 and report the incident, they can dispatch people who are trained to decontaminate the area.
- **Do not clean blood or other bodily fluids unless you have proper PPE and have completed your annual BBP training.**

UTILITY INTERRUPTION

All weekday gas, water, or electric utility interruptions on the Orono Campus should be reported to the Work Control Center at 1-4400. On nights and weekends, report interruptions to the Police dispatcher at 1-4040. If it is necessary to shut off gas, water, or electricity to points on campus, the Facilities Management staff will give advance notice, if possible, to all building managers affected.

When electrical power is lost:

- Extinguish any flames and terminate any experiments. Ventilation through the chemical fume hood ceases with the power loss and may not automatically return with the power.
- Turn off as much electrical equipment as possible to minimize the electrical load when power is restored. This also protects the equipment from voltage fluctuations.
- If persons are trapped in the elevators, call 911 as necessary.
- Do not open refrigerators or freezers unless absolutely necessary.
- Long term power outages may require the evacuation of the building.

MAINTENANCE

Emergencies on the Orono campus requiring the services of the Facilities Management shops should be reported to the Work Control Center at 1-4400. The shops include the Carpenter Shop; Electrical Shop; Locksmith Shop; Paint Shop (for glass); Plumbing Shop (includes propane gas); and Heating, Ventilation, Air Conditioning, Roofing, Grounds and Garage.

If there is no answer at the above number, call the Police dispatcher at 1-4040.

ASBESTOS & LEAD CONCERNS

Asbestos and lead containing building materials have been identified in buildings on campus built prior to 1980. Asbestos is most often a component of the following building materials: ceiling tiles and their adhesives, floor tiles and their adhesives, duct installation and tapes, laboratory counter tops, fume hoods, and pipe insulation. Not all types and forms of these materials contain asbestos. It is important that you do not disturb these materials by moving, removing, breaking, cracking or dismantling them. Contact the OFM Asbestos and Lead Project Manager for an assessment should you encounter these materials in poor condition or damaged. Lead is most often found in interior and exterior paints used on older buildings on campus. Should you encounter peeling paints, please contact the Asbestos and Lead Project Manager for assessment.

Neither asbestos nor lead pose health risks when they are intact, such as intact floor tiles, ceiling tile, or pipe insulation or paint.

Asbestos and Lead Project Manager.....1-3063

SHELTER-IN-PLACE EMERGENCY INSTRUCTIONS

Shelter-in-place is a method of self-protection from airborne contaminants. In the case of a release of toxic airborne material, shelter-in-place can be more effective than an evacuation. The following check list should be used when a shelter-in-place is ordered:

1. Close all doors, including internal doors, and lock all windows (windows seal better when locked).
2. Seal any gaps around windows and doors with tape or wet towels. (The bottom of doors are especially prone to leak). Close curtains and drapes.
3. Extinguish any open flame such as Bunsen burners and gas stoves.
4. Window air conditioners should be turned off, inlets switched to closed position, and vents sealed with tape and plastic sheeting, wax paper, or aluminum wrap, if possible.
5. Chemical fume hoods should be turned off after experiments are terminated, then sashes should be lowered and sealed shut.
6. Turn off all exhaust fans such as bathroom and kitchen fans, then seal fan openings.
7. Do not use elevators as they can act as pistons pulling air in from the outside.
8. Do not use the telephone except for emergency purposes to avoid overloading the phone system.
9. If the fumes begin to bother you, breathing through a damp cloth or handkerchief can many times offer some relief.
10. Listen to radio and television for announcements or call 1-INFO (4636) for information.
11. When the situation is over, open all doors and windows and place ventilation on 100% fresh air to remove any contaminants that have built up inside the building.

(This is not an alternative evacuating a building when the alarm sounds, shelter-in-place only when directed to do so by authorities).

Suspicious Mail

If you receive a package or letter that you suspect may be a terrorist threat, then:

- Do not handle or move the suspicious mail.
- **DO NOT** pull the fire alarm.
- Exit the immediate area and ask others to do the same.
- Avoid tracking any spilled materials.
- Secure the area by closing and locking the door, or other means to keep people away.
- Wash your hands and other areas of exposed skin vigorously with soap and water. (If possible have someone else call 911 while you are washing).

- **Call 911.**
- Police officials will respond to assess the situation and determine what further action is required.
