

Synapse

UMaine's own Course Management System

November 3, 2009

(Tuesday)

12:00 – 1:00 p.m.

**Wells Conference
Center, Room 3
(2nd floor)**

This demonstration presents home-grown, cutting-edge software for managing courses.

Synapse is a Web application that integrates learning-management and course-management features in a single package.

It provides a visually rich learning environment, accommodating all kinds of educational multimedia, online chat, and student self-testing mechanisms.

Faculty can monitor student progress across multiple courses. They can apply a variety of scoring tools, including customizable rubrics, and integrate data from UMaine resources, such as Test-Scoring Services and in-class PRSs (clickers).

Synapse was developed by the BioMediaLab in the School of Biology and Ecology and is currently used in biology courses, including the large introductory course.

Please join us as **Professor Seth Tyler** and **Ron Kozlowski** demonstrate this remarkable technology.

Please register by

October 27

by calling
581-3472, or
e-mail

CTE@umit.maine.edu

This event is free and open to all UMaine faculty, instructors, staff and graduate students interested in teaching

*Supported by the Adelaide C. and Alan L. Bird Fund
for Instructional and Faculty Development*
