

Date: _____ Surveyor: _____ Pool Name*: _____

Town/Township: _____ County: _____

GPS Location of vernal pool (UTM, NAD83 preferred)*: _____

Longitude/Easting: _____ Latitude/Northing: _____ Datum: _____

Brand and Model of GPS Unit: _____

1. Approximate size of pool (at spring highwater): Width _____ (m or ft?)
Length _____ (m or ft?)

Select size class*:

- 0-0.1 acre 0.1-0.5 acre 0.5-1 acre >1 acre

2. Dominant surrounding habitat of pool:

- Coniferous forest Meadow/grassland Other: _____
 Deciduous forest Peatland
 Mixed forest Shrubby swamp

3. Please record exact number of egg masses in pool*:

SPECIES	EGG MASSES
	#
Wood Frog	
Spotted Salamander	
Blue-Spotted Salamander	

4. Were caddisfly larvae observed within the vernal pool depression? YES NO

5. Within a 1 foot perimeter of the observed egg masses, were caddisfly larvae*:

- absent scarce abundant

6. Were cigar-tube caddisfly larvae observed on egg masses? YES NO

- Were log-cabin caddisfly larvae observed on egg masses? YES NO

Please record AVERAGE number of larvae observed per egg mass, for each species:

SPECIES	WOOD FROG EGG MASSES #	SPOTTED SALAMANDER EGG MASSES #	BLUE-SPOTTED SALAMANDER EGG MASSES #
Cigar-tube caddisflies			
Log-cabin caddisflies			

7. Has a sample of the observed caddisfly larvae been obtained and preserved in a vial of alcohol?
YES NO

8. Has a State Significant Vernal Pool Survey form been filled out for this pool? YES NO

--Additional information on back--

***If a State Significant Vernal Pool Survey form has been filled out for this pool, please write the same unique pool name in the name field on this form that was used on the SVP form.**

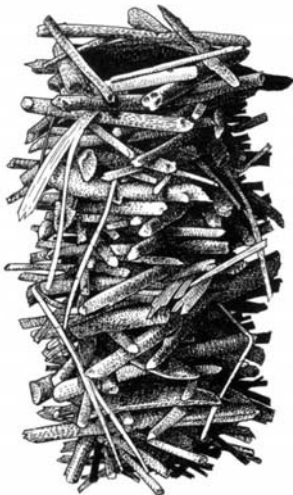

*1 acre=43,560 square feet or 4,840 square yards

*When recording location, the GPS location is preferred. However if the surveyor is not able to divulge that, the town/township and/or county will be fine.

*When recording egg mass numbers, exact counts are preferred. However if time is limited, estimates are okay.

*When quantifying caddisfly larvae observed within a 1 foot perimeter of the observed egg mass(es), the terms scarce and abundant are relative to the amount of larvae observed in the pool being surveyed.

Log-Cabin Caddisfly Larvae Case:

Cigar-tube Caddisfly Larvae Case:
